

## Offshore Staff Augmentation

Maintaining an appropriately skilled IT department is one of the most important -- and costly -- components of any organization. Ensuring availability of necessary technical and niche skills for critical short-term projects can mean having these costly resources sit idle during periods of low demand. Also, in many cases building the necessary expertise internally can be difficult or costly.

Offshore has emerged as one solution for companies that are challenged with accurately forecasting their internal resource needs while maintaining cost thresholds. Offshore staff augmentation through Kforce Global Solutions offers an effective, highly flexible solution.

### Comprehensive Staff Augmentation

We offer staff augmentation services of two or more resources across a wide variety of technical and functional skill sets, and maintain a bench of skilled resources ready to rapidly respond to shifting requirements.

For larger augmentation engagements, we have developed sophisticated tools to plan and track work and resources, allowing us to forecast requirements and ensure skill coverage and knowledge transfer is maintained. Our experienced team is ready to support strategic and tactical business needs. Whatever the client staff augmentation requirements, Kforce Global Solutions is ready to meet them.

### Delivering Value

Offshore staff augmentation through Kforce Global Solutions delivers significant value to our clients, including:

- **Cost Reduction** – Typical savings are 50-75% when compared to onshore rates. This provides clients with a mechanism to temporarily augment their resource base without breaking their budget.
- **Skills** – With extensive in-house expertise across technical and functional areas and access to a Philippine graduate pool of 450,000 university graduates/year through our full-time in-house recruiting team, we can supply expertise in virtually any application, product, or function to meet the client's needs.
- **Flexibility** – Our Manila facilities are open 24/7, so resources can be available during the client's work day or around the clock as required. Additionally, the team size can flex up and down depending on immediate needs so no one is idle and the client is never without resources focused on key business priorities.

### Skill Families

Kforce Global Solutions offers the comprehensive skills our clients expect from their offshore staff augmentation partner, including:

- Application and Web Development
- Business Analysis
- Quality Assurance and Testing
- Project Management
- Database
